FOR IMMEDIATE RELEASE

Innovative Engineering, Inc. (IEI) Has Expanded Their Engineering & Design Services for Electric, Gas, and Water Utilities:

IEI is pleased to announce that with the addition of multiple talented utility engineering and design professionals to the team; we have expanded our service offerings to serve our existing client base and the broader utility market. The current clients of IEI have benefited from having their Civil, Geotechnical, Electrical, Mechanical, and Structural disciplines, all in one location, working on their projects simultaneously and producing the quality results that they are accustomed to and expect.

IEI offers a comprehensive approach to “**Electric Utilities**” needs for design and engineering services, we will expedite your project and coordinate all activities of transmission, distribution, smart grid, and generation design. From planning to implementation Innovative produces results. With decades of utility, power, and distribution design experience we provide quality engineering and the rapid turnaround our clients require to remain competitive. Our Power and Utility Design services include: overhead and underground distribution design, smart grid network design and engineering, civil and site plan engineering, site and ROW acquisition, site surveys and environmental assessments, substation design & engineering, SCADA relay/system protection design and engineering, evaluation of existing power systems, as well as electric generation, transmission, and distribution infrastructure engineering for all size projects.

Additionally, for “**Gas Utilities**” IEI offers a wide range of services stemming from our civil engineering and site development group to support the gas industry. IEI’s services include: Right -of-way acquisition, site and roadway design, storm water management, environmental permitting, regulatory support, erosion control, and site grading, planning, and drainage.

IEI also has extensive experience in the field of “**Water Utilities**”/ Water Resource Engineering. This discipline involves the planning, design, management and construction for supplying water, improving water quality, and preventing damage from flooding. Some of IEI’s services include: right of way & easement assistance, engineering for water main replacement and install projects, water supply protection, treatment systems design, pump station design, water main distribution and pump systems, drainage and storage design, and storm water management.

"We have continued and anticipate our expansion deeper and wider into the utility market, and The IEI team has worked with some of the largest and most reputable utilities on the east coast, successfully engineering and designing many projects," said Lou Scheidt, P.E. P.P., President and CEO of Innovative Engineering, Inc.

Please call to discuss the ways we can work with you on your current or upcoming project.

IEI’s corporate headquarters is conveniently located in Wall Township, Monmouth County, New Jersey - a location that has allowed the firm to respond to clients’ needs in a timely and efficient manner for the past 34 years. IEI provides high quality professional engineering and design services to utility companies, educational facilities, government agencies, property owners, alternative energy companies, real estate developers, telecommunications companies, architectural firms, housing developers, retail companies, and municipalities. The diverse staff of 50 professionals, with over 10 professional engineers (PE’s), licensed in over 30 states, has a long-standing, proven record of accomplishment and producing results in a cost-effective manner that maximizes their clients’ engineering investment. The firm is also a registered SBE in the state of New Jersey, and an SBA within the United States.
